

Hi there! Hola!
Salut! Alo! Hello!
Hallo! I'm Ana ☺

Ana García del Molino, PhD

*I apply state of the art ML to multimedia content to achieve better user experience, efficient use of business data and ultimately increased revenue.
In return, I expect mentorship and to expand my business knowledge.*

Who would you be hiring?

I'm used to ambiguous and fast-paced environments, where the objectives and methodology need defining and continuous re-assessment. I deep dive, take ownership and deliver results.

I love a good brainstorming. I am analytical and always down to assess the suitability of the proposed approaches, own or otherwise.

I enjoy working in multicultural and cross-domain teams. There's so much to learn from each other in such diverse environments.

After a decade in Asia, my next adventure shall be back in Barcelona. But not before an overlanding road trip across central Asia!

Professional Experience

📍 ByteDance - TikTok, Singapore
📅 Sept 2020-Today
🕒 Computer Vision Scientist

Technical counterpart for TikTok Live products and Business Integrity to define vision and deploy new features.

Main Responsibilities:

- Technical lead for code development and operations of online real-time services.
- Responsible for code development, release, and maintenance.
- Responsible for deployment high availability and fast response during outages.
- Point of contact for the infrastructure team to ensure smooth integration with new platform releases.
- Continuous communication with upstream teams to ensure data readiness in fast-paced environments
- Creation of reusable artifacts to enable fast deployments and new feature adoptions
- Model performance reporting with real-time dashboards for effective communication with stakeholders.

Key takeaways and demonstrated skills as per my internal evaluations:

- I have been creative to innovate and improve processes in ambiguous and undefined projects.
- I have been involved in very diverse projects with cross-functional teams, refining my versatility and driving my self-development.
- I have acquired solid business acumen. This allowed me to interlock highly technical teams and business stakeholders.
- With my technical know-how, I created and implemented methodologies for reusing data products, both across projects and teams.
- I have mentored and evaluated interns toward their transition to full-time employees.

Multimodal Classification · ML Ops · Real-Time Services · Async Processes and Development · Data Analytics and Dashboarding · Scheduled Data Processing

Python · TensorFlow · PyTorch · HSQL · PySpark · Golang · Redis · Kafka · JavaScript

Content Understanding for TikTok services.
ML Ops to support both Ecology and Business Integrity.
Mentoring of engineering interns and co-supervision of PhD candidates.

Role - Owner of content tagging services in TikTok Live:

- Continuous improvement of the model design, training and benchmarking to increase recall by at least 5-10% with a target of 80% precision.
- Optimization of processes for data collection and labeling, resulting in the daily selection of 50k labeling tasks with a ~95% positive ratio.
- Automated model iteration, resulting in improved performance for critical business requirements, increasing F1 score from 70% to 95%.

Role - Owner of industry detection for Business Integrity:

- Model design, training and benchmarking to support new business requirements. Accuracy >75% for 800+ industries.
- Data cleaning, deduplication and aggregation across multiple sources, implementing a weekly automated collection of ~10k relevant training samples from the platform's moderation teams.
- Reusability of classification services to be used for risk moderation. Maintain low censor rate of ~1% ensuring over 95% precision for prohibited ad detection.

📍 BIGO Tech., Singapore
📅 April 2019-Aug 2020
🕒 Sr. AI Algorithm Engineer

DCNNs to predict PCA parameters for graphic 3D modeling.

GANs for face expression manipulation.

DCNN-based autoencoders and U-Nets for image and video refinement and style transfer.

VAE · GAN · Face Landmark Detection and Tracking · Style Transfer · 3D Rendering

Python · TensorFlow · PyTorch · C# · Blender

📍 I2R, A*STAR, Singapore
📅 2014-March 2019

🕒 Ph.D. Candidate
👤 Supervised by Joo-Hwee Lim

📄 **Visual Understanding and Personalization for an Optimal Recollection Experience**

- 🔗 Modeling of lifelog photo-stream sequences using LSTM networks, to detect daily activities and learn associations between life events.
- 🔗 Use of conditional random fields and probabilistic inference for interactive video summarization with diversity and query-driven objectives.
- 📄 Use of image quality analysis and semantic retrieval techniques for query-based lifelog summarization.

Object Classification · Activity Recognition · Facial Recognition · Transfer Learning · Spatio-Temporal Learning with LSTM · Episodic Memory

MATLAB · Caffe · Python · TensorFlow · C++ · Prototyping

📍 gifs.com, Zurich
📅 Summer 2017
🕒 Research Consultant

📄 Use of a deep ranking model with personalizable input to customize the highlight detection in videos.

Action Classification · Recommendation Systems · Pattern Recognition · Action Understanding

Python · TensorFlow · DataFrames · SQL · Prototyping

📍 National Inst. of Informatics, Tokyo
📅 2013
🕒 Research Intern

Extension of the Bag of Words instance search technique by geometric coding and quantization error compensation.

Object Recognition and Retrieval · SURF & SIFT Descriptors · Hamming Embedding · Bag of Words

MATLAB · C++ · OpenCV

Education and Languages

PhD. in Cognitive Systems and Visual Computing

School of Computer Science and Engineering
2015-2019

BSc. and MSc. in Telecomm Engineering

TelecommBCN (ETSETB)
2008-2013

Native
 Native
 Fluent
 Proficient

Honors and Awards

Obra Social "La Caixa" 2014

Private fellowship to support postgraduate studies in North America and Asia-Pacific.

SINGA Scholarship 2015

Award given by A*STAR to international students to pursue their PhD at a Singapore University.
